Profile

Mid-level full-stack and mobile developer with 4+ years of commercial experience shipping production iOS/Android apps and scalable web systems. Core stack: React Native, React.js, TypeScript, and Laravel with a strong focus on clean architecture and seamless user experience. Consistently solo-delivered complex products end-to-end and led performance-critical refactors. Open to mid-level to senior roles with greater ownership over technical decisions.

Technical Skills

Languages: JavaScript · TypeScript · PHP · Python · HTML · CSS

Frameworks & Libraries: React.js · React Native · Node.js · Express.js · NestJS · Laravel · Inertia.js · Redux · Tailwind · SCSS

CMS: Payload CMS

Databases: PostgreSQL · MongoDB · MySQL · DynamoDB

Platforms & Tools: AWS · Firebase · Docker · GitHub · Bitbucket · Postman · VS Code · Kali Linux

Methodology: Agile

Professional Experience

Mid-level Software Developer · [Scorchsoft](#)

Birmingham, UK · Dec 2023 – Present

- Delivered **8+ production apps** across mobile and web, including: a dual-camera live-streaming and ticketing social platform (Gapped), a care home healthcare assessment app with an internal React analytics dashboard (IStumble).
- Refactored 80% of Prakash Astrologer's codebase (10k+ downloads): migrated from React Native CLI to Expo, upgraded IAP and push notification packages, and introduced subscription billing, restoring App Store compliance and cutting crash rate significantly.
- Led performance overhaul of a high-traffic teacher assessment platform: introduced Laravel queues, Redis caching, fixed N+1 queries, implemented effective DB indexing, and assisted with ECS/Fargate infrastructure setup, cutting average response time by ~60%.
- Collaborated with cross-functional teams and external clients to gather requirements, communicate progress, and deliver tailored software solutions in an Agile environment.

Full-Stack Developer · [SafeNet Education](#)

Yangon, Myanmar · Dec 2022 – Nov 2023

- Solo-built and redesigned the company's public website using Payload CMS and rebuilt the internal staff portal (React.js · MongoDB · MySQL · Nodejs) from design to deployment, as the sole developer.
- Implemented HTTPS enforcement, RBAC, and input sanitisation, achieving zero security incidents over 12 months of live operation.
- Managed email infrastructure for 50+ accounts at 99.9% uptime; integrated payment, SMS, and analytics APIs, saving ~5 hours of manual admin per week.

Featured Projects

- [Gapped App](#) *React Native · Laravel · Firebase* | Social media platform with dual-camera live streaming, event ticketing, and real-time feeds. Live on App Store.
- [IStumble App](#) *React Native · Laravel · Firebase* | Healthcare platform for care homes: staff submit assessments; built an internal React dashboard for managers to review statistics and export reports.
- [Path2Uni](#) *[Personal] React Native · Laravel · MySQL* | App for Myanmar students pursuing overseas study: browse universities, book consultations, scan documents, and chat with AI. Live on App Store.
- [Paddington](#) *[Personal] React · Inertia.js · Laravel · GPT-4o Realtime API* | English learning web app with real-time AI spoken practice, performance reports, feedback analysis, and auto-generated IELTS materials.
- [Prakash Astrologer](#) *React Native · Expo* | 10k+ downloads. Refactored 80% of the codebase, CLI to Expo migration, IAP and push notification upgrades, subscription billing.
- [StayForWork](#) *Laravel · React 19 · TypeScript · Inertia.js · MySQL · Redis · Filament · AWS S3* | B2B corporate accommodation platform: enquiry to booking lifecycle, host quoting with commission, Haversine-based recommendations, gamification, 30+ email templates, Filament admin panel with analytics dashboards, and sole ownership of CI/CD pipeline and infrastructure setup for staging and production environments using GitHub Actions and GHCR.
- [SPX](#) *NestJS · React 19 · TypeScript · MySQL · Prisma · Redis · BullMQ · Meilisearch · AWS S3* | Multi-tenant SaaS for field operations: asset compliance, inspections, KPI tracking, visit scheduling, shipment logistics, Meilisearch-powered global search with scope-aware filtering, 2FA, JWT rotation, and CI/CD via GitHub Actions.

Education

Level 3 Access to Higher Education (Computing) · [Chichester College](#)

Aug 2022 – May 2023

- Achieved 8 Distinctions & 1 Merit across 9 units, finishing top of the cohort.
